

Ideation Phase

Brainstorm & Idea Prioritization Template

Team ID	PNT2022TMID38841
Project Name	Signs With Smart Connectivity For Better Road Safety
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 🕒 10 minutes to prepare
- 🕒 1 hour to collaborate
- 👤 2-8 people recommended

➔

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

A Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

C Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM

Static signs delay the traffic by stopping the vehicles at the intersection during peak hours.

PROBLEM

During signals breakdown, there are serious and widespread traffic difficulties during peak hours.

Key rules of brainstorming

To run a smooth and productive session

🗣️ Stay in topic.

💡 Encourage wild ideas.

👂 Defer judgment.

👂 Listen to others.

🗣️ Go for volume.

👁️ If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

🕒 10 minutes

TIP
You can select a sticky note and hit the pencil icon to start drawing!

SABITHAK

Digital speed limit maintain system

DHANUSH KUMAR GM

Animal crossing detection system

when the vehicle crosses the stop line in load signal, automatically the vehicles shutdown

speed sensor controls the speed according to the road rules

PRAVEEN R

When the vehicles crosses the stop line in road signal, an alarm be set by keeping sensor on the stop line

Send out geo-location data in order to sustainable and autonomous on open road

K K GAUTAM R

Intimating road signs on prediction

signs will appear promptly and automatically on in-vehicle displays to alert the driver

Accident prevention in foggy areas using sensor detector to alert the vehicle

We can get an indication before going to the road which is blocked, through sensor

sending distance between the vehicles and intimating through a beam and make the distance between vehicles as decided per rules

Digital signs are not affected by poor weather and lighting conditions, unlike existing traffic sign posts.

For emergency vehicles, e.g., ambulances, it dynamically creates "green routes" by adjusting the frequency of the traffic signs to reduce the time of intervention

Drivers to be informed of the availability of the charging stations and petrol pump

Helping road users navigate through or around special events.

Implementation of digital road signs on critical intersections

Alarm intimation on parking vehicle in no parking

Placing digital signs on turning places to avoid accident

sensors on satellite to monitor the traffic controls

predict overload for imbalance of vehicle

location information of digital sign posts are transmitted to on-coming call

Improved safety of Vulnerable Road Users (VRU), like pedestrians, cyclists, etc.

The server has to perform authentication to ensure clients are genuine, and that acknowledgements of the signs are made by the client.

Improved driving experience, reducing the time it takes to circumvent blocked traffic situations related to accidents, road works

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

🕒 20 minutes

GPS tracking (location data)

Detective sensor

Alert message

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

🕒 20 minutes
